TELECOMMUNICATIONS AND RADIO ENGINEERING

CONTENTS FOR 1983

NUMBER 1

	Page English	Page Russian
PART 1 TELECOMMUNICATIONS Volume 37		
SATELLITE COMMUNICATIONS		
C.V. Borodich: A Simplified Procedure for Calculating the Interference between Networks for Fixed Satellite Service when They are Coordinated	1	14
V.V. Timofeyev: Refinement of the Criteria for Coordinating Satellite Networks	6	18
MULTICHANNEL WIRE COMMUNICATIONS		
O.N. Porokhov: An Investigation of Signal Compatibility in Analog and Digital Communication Systems	9	20
S.A. Gridnev: Computer-Aided Design of a Trunk Line for Digital Transmission Systems	17	26
L.N. Oganyan: Optimization of the Structure of a Cycle for Digital Transmission Systems	20	28
V.S. Rombro and M.B. Shkol'nikov: The Noise Immunity of a Trunk Line of the VLT-1920 System Using an Attended Repeater Station Section of Extended Length	25	32
V.I. Kirillov: The Loss of Noise Immunity of an AGC Section in the Trunk Line of Transmission Systems	30	36
MULTICHANNEL RADIO COMMUNICATIONS		
L.S. Tartakovskiy: A Simple Method for Calculating the Crosstalk Produced in RRL Channels by Incidental Currents in the Antenna-Waveguide Channels	36	40
A.A. Metrikin and E.S. Osipov: A Multimode Antenna Feeder for Radio-Relay Links in the 8 GHz Frequency Band	42	45
ANTENNAS AND ANTENNA FEEDER DEVICES		
S.M. Kutuzov: A Method of Controlling the Radiation Pattern of Large Radio Telescopes Using Phasing Matrices	47	49
V.M. Antonenko, I.Z. Berlyavskiy, A.M. Model and V.I. Chubis: A High-Power Stripline Adder and Switch	51	52
B.M. Katz, V.P. Meshchanov and V.A. Berezhnoy: Standardized Stepped Directional Couplers	54	55
A.M. Somov: The Noise Temperature and the Noise Figure of Merit of an Axially Asymmetrical Dish Antenna	57	57

	Page English	Russian
PART 2 RADIO ENGINEERING Volume 38		
V.M. Proleiko: Microprocessor Techniques — The Basis of Technical Progress in the Eighties	61	3
DEVELOPMENT, DESIGN AND PROGRAMMING		
S.Ya. Shats and Yu.V. Khamilevich: The Problems Involved in Developing and Using Microprocessors	63	6
Yu.E. Golyas and V.A. Tikhonov: Microprocessors in Radio Engineering	67	11
V.A. Shakhnov: Microprocessor Computational Techniques—A New Class of Electronic Technique	71	15
A.T. Loleit: A Device for Debugging Microcomputer Software	73	18
N.G. Topol'skiy, V.I. Bozhich and V.F. Krivoruchko: A Method of Optimizing the Structure of a Microprogramming Device for Controlling a Microprocessor	76	21
V.I. Ivanov, E.A. Ivanov and L.L. Murenko: Soviet Miniature Personal Computers	79	24
S.A. Nesterenko and A.E. Reznik: Sequential Channel of a Single-Crystal Microcomputer, Compatible with the Channel of the Single-Chip Microcomputer of the Electronika S5 Family	81	27
PERIPHERAL EQUIPMENT FOR MICROPROCESSORS AND MICROCOMPUTERS		
V.I. Archakov, A.S. Basmanov and Yu.F. Shirokov: Microperipheral Circuits for Automatic Systems and Computing Complexes Based on Microcomputers	85	32
P.D. Kuznetsov, A.A. Kozak and M.S. Bezrodnyi: Data Input-Output Displays for Microprocessor Computing Facilities	88	36
V.F. Lamekin: Analog Microprocessors for Communications Systems	91	40
E.A. Kaplin, V.N. Saskovets, V.N. Blinov and P.V. Maglyshev: Construction of an RF Communications Control System Based on Microprocessor Facilities	94	43
E.S. Atoyev, M.Ya. Litovskiy and V.V. Krest'yaninov: Microprocessors in Equipment for Increasing the Reliability of Marine Radio Communications	98	48
V.S. Kuz'kin: Digital Difference Filtering	102	52
E.I. Glushankov and V.V. Davydenko: The Choice of Microprocessor for Carrying Out a Linear Filtering Algorithm	104	54
Yu.V. Arzumanyan and I.S. Izrailit: The Design and Construction of Microprocessor Digital Matched Filters	106	57
V.D. Kolesnik, B.D. Kudryashov, V.N. Saskovets and N.A. Shekhunova: The Feasibility of Microcomputer Decoding	109	60
V.V. Shakhgil'dyan and V.G. Luchkov: A Digital Frequency Synthesizer Containing a Microprocessor	111	62
Yu.D. Proskuryakov and Z.M. Kanevskiy: Simulation of Interference in Communication Channels Using Microprocessor Systems	113	65
B.Zh. Abilov and A.V. Krotov: The Use of a Microcomputer to Determine the Statistical Characteristics of the Time Distortions of Radio-Telegraph Signals	117	59
MEASUREMENTS AND CONTROL USING MICROPROCESSORS AND MICROCOMPUTERS		
V.V. Piskorzh and V.A. Volokhov: A Digital Processor of a Scanning Frequency Meter	119	70
N.D. Golubentsev and V.N. Lukinov: A Program-Controlled Logarithmic Voltage-Ratio Meter	121	73
L.L. Murenko, E.A. Ivanov, S.B. Domnin and V.N. Lenichenko: A Unit for Debugging Systems Employing the K580IK80 Microprocessor	124	76

	Page English	Russian
MICROPROCESSORS AND PERSONAL RADIOELECTRONIC APPARATUS		
V.I. Lobanov, A.I. Fedulov and L.N. Ivanov: Use of Microprocessors in Home Radio Receivers	127	79
L.M. Rivkin and V.K. Yurik: Use of the Series K580 Microprocessors in Home Magnetic Recording Equipment	130	82
V.K. Yurik and P.A. Orlov: The Use of Microprocessors in Wireless Remote Control Systems for Home Electronic Equipment	133	85
MICROPROCESSORS AND MICROCOMPUTERS IN DIFFERENT APPARATUS		
L.P. Gavrilenkova, G.I. Gorgonov, I.G. Kleyman and I.P. Tsivlin: A Radar Rangefinder Employing a K589 Microprocessor	134	87
Yu.E. Golyas and V.A. Tikhonov: A Microprocessor Corrector in a Radio-Telescope Control System	139	91
M.N. Kuzentsov and A.I. Savin: Microprocessors in Control Systems for Special Production Processing Equipment	141	93

NUMBER 2

PART 1
TELECOMMUNICATIONS
Volume 37

COMMUNICATION LINES		
I.I. Grodnev, V.N. Korshunov and B.Ya. Ruvinov: Long-Distance Optical Cables	1	6
A.S. Vorontsov, T.A. Kresina, K.G. Levinov, P.A. Frolov, and R.A. Shapiro: A Trunk Coaxial Cable Extending to 60 MHz	5	9
I.G. Zdanovich: An Investigation of the Amplitude Factor of the Approximate Impulse Response of Coaxial RF Cables	7	11
TELEVISION		
N.A. Reushkin and T.A. Kodaneva: Optimization of Microrepeater-Amplifier Parameters	12	14
G.V. Babuk and A.K. Kustarev: The Transmission of Brightness Levels when Receiving a Color TV Signal on a Black-and-White Television Receiver	16	18
V.I. Shchurskiy, Yu.S. Anfimov and A.R. Ukhova: A Detector of a Broadcast Television Signal	24	24
ELECTRIC POWER SUPPLIES		
N.M. Sergeycheva: Center-Point Grounding of Remote Power Supply Circuits in Transmission Systems	28	38
B.A. Glebov, A.A. Novikov and A.M. Shiladzhyan: A Bridge Voltage Converter Without an Input Transformer	32	41
L.A. Kraus and G.I. Saf'yanovskaya: Circuit Analysis of a High-Power, Low-Voltage Rectifier	35	44
CIRCUIT THEORY. ELEMENTS AND CIRCUITS		
V.N. Zhelnov: Estimation of the Image Interference of a Synchronous Filter	38	47
A.V. Bondarenko and V.I. Sudakov: Electronic Tuning of an Active Filter	43	43
Yu.N. Grachev, A.V. Pestryakov and V.N. Fedoseyeva: A High-Speed Frequency Divider with a Variable Division Factor	46	54
G.M. Mikirtichan and N.I. Gol'denberg: Analysis of an Active RC Phase Shifting Circuit Containing Only One Transistor	50	57

	Page English	Page Russian
CONTROL AND MEASUREMENT		
G.Ya. Mirskiy and S.U. Klimovich: Measurement of Average Signal Power in the TF Channels of Transmission Systems	54	60
PART 2 RADIO ENGINEERING Volume 38		
E.A. Volkov: A Method of Analyzing Nonlinear Effects in Radio Receivers	58	3
BRIEF COMMUNICATIONS		
A.P. Rodimov and A.M. Mavrodiyev: An Approach to the Synthesis of Adaptive Radio Links Based on a Composite Criterion	65	11
L.A. Shkol'nyi and L.M. Morozov: Influence of Signal Phase Fluctuations on the Measuring Properties of a Radar Station with a Synthesized Antenna	67	14
G.B. Gol'fel'd, V.G. Bartenev and A.M. Shloma: Normalization for Invariant Signal Detection on a Passive Noise Background	70	17
P.P. Beskid, A.A. Bubnov and V.V. Leont'yev: Dynamic Measurements of the Effective Scattering Area of a Target	72	19
Li Za Son: Conversion of Different Representations of Receiver Intermodulation Characteristics	74	22
A.V. Zakharov: Synthesis of Low-Sensitivity Oscillatory Systems	76	24
A.Ya. Sergeyev, V.A. Tartyzhev and M.A. Utkin: A Push-Pull Amplifier Dual to Class *B*	79	28
A.G. Ostapenko: Design of Tuneable Digital Filters	82	31
V.K. Labutin and V.N. Chechulin: A Frequency-Conversion Method for Digital-Filter Design	84	34
R.B. Shemshedinov: The Effect of Destabilizing Factors on the Accuracy of Fixing the Time Position of Signals	87	37
M.I. Zhodzishskiy: Optimum Readout Processing of Signals on a Background of Interference with an Arbitrary Distribution	90	40
I.V. Sitnyakovskiy, A.L. Nekhayev and A.V. Ivanov: Comparison of Four Adaptive-Prediction Algorithms for Differential PCM	94	44
A.U. Zhil'tsov and A.V. Korolenkov: Investigation of the Effect of the Antenna Radiation Patterns on the Operation of an Extended Short-Wave Radio Link	96	46
V.M. Bulkin, V.A. Kleimenov, S.D. Kremenetskiy and M.T. Novosartov: Synthesis of an Array with a Fixed Field Amplitude or Phase Distribution over Part of the Aperture	98	49
V.I. Afromeyev: Design of Waveguide-Dielectric Filters Using Cutoff Waveguide	101	52
G.I. Veselov and S.B. Rayevskiy: The Spectrum of Complex Modes in a Circular Dielectric Waveguide	103	55
L.I. Freidin and V.I. Uvbarkh: Matching of Immittances with One- and Two-Step Transformers of Minimum Length	106	58
V.M. Stechenko: Multistage Directional Couplers Using Lumped Elements	109	61
M.L. Basalayev: Approximation of Atmospheric Radio Interference in the Arctic Using Hall's Model	111	64
I.F. Budagyan, D.I. Mirovitskiy and V.I. Ponomarenko: Solution of the Transcendental Equations Appearing in Problems of Electrodynamics by Reducing Them to Differential Equations	114	66
G.V. Merkishin: Reception of Modulated Radiation in Matrix Photodetectors	116	69
R.G. Tolparev, V.A. Pølyakov and E.V. Borisov: Asymptotic Reception of Optical Signals under Conditions of Uncertainty	118	71
A.N. Zeliger: Determination of the Optimum Impulse Characteristic of a Linear Correcting Circuit of an Optical Signal Receiver	120	73

	Page English	Russian
FOR THE ENGINEER		
V.A. Fedorchenko: Joint Distribution and Numerical Characteristics of a Fluctuating Radio-Pulse Train at the Output of a "Filter-Square-Law Detector" System	123	76
V.M. Nazarenko, I.V. Il'inskiy and O.A. Potsepnya: High-Speed Digital Frequency Synthesizer with a Small Tuning Step	126	80
B.L. Yerukhimov: A Simple Approximation of the Error Function	128	82
Il'deberto Khardon Agilar: Effect of Oscillator Nonlinearity on the Measurement of the Intermodulation of Amplifiers	129	84
Yu.A. Makhotenko: Factographic Card Files for Radio Designers	132	87
Yu.V. Pimenov and A.K. Salakh: Effect of a Grooved Reflector on the Radiation Pattern of a Linear Radiator	134	89

NUMBER 3

PART 1
TELECOMMUNICATIONS
Volume 37

AERIAL AND FEEDER EQUIPMENT		
V.D. Kuznetsov, V.K. Paramonov and N.V. Soshnikova: New Receiving Antennas for the "EKRAN" System	1	6
A.A. Timofeyeva and V.G. Yampol'skiy: A Radiator for Axially Unsymmetrical Reflector Antennas with a Circular Aperture	5	8
Yu.I. Nafikov: The Directional Properties of Passive Reflector-Type Repeaters	11	13
R.R. Kamayev, T. Orozobakov, E.K. Heide and E.K. Dalbayev: The Use of Reflector-Type Passive Repeaters on Line-of-Sight Radio-Relay Links	18	19
BROADCASTING, TELEVISION		
N.M. Balan, A.V. Vykhodets, V.I. Denisov, V.V. Korolkov and G.V. Rabinovich: The Effectiveness of Methods for the Partial Neutralization of Distortion When Transmitting a Digital Sound Broadcasting Signal	22	22
N.A. Barkova and A.A. Glukhov: Distribution of the Duration of the Maximum Values of the Level of a Compressed Broadcast Signal	25	25
A.N. Taravkov: A Medium-Wave Antenna Installation in Conjunction with Television Transmitting Stations	29	28
V.P. Ilyichev: The Identification of the Elements of a Broadcast Signal	35	33
A.A. Borodyanskiy: The Optimum Sampling of Moving Images	38	35
CONTROL AND MEASURING		
S.M. Vernik, N.V. Kurshev, B.K. Nikitin and V.B. Rudnitskiy: The Measurement of Crosstalk between Trunk Lines	43	40
A.R. Shpigel and V.M. Shchavinskaya: The Probability Distribution of Quantization and Overload Noise in the Tone-Frequency Channel of a Transmission System Using Pulse Code Modulation	47	43
M.G. Oisgelt: The Selection of the Optimum Parameters of Magnetic Detectors for Cable Run Location Devices	52	47
COMMUNICATIONS NETWORKS		
T.P. Sergeyeva: The Optimum Organization of Transit Facilities for Channel Groups in Network Junctions by Means of a Computer	57	50
COMPONENTS AND CIRCUITS		
L.S. Maryanovskiy: Calculation of the Temperature-Frequency Characteristics of Quartz Resonators with Thin-Film Heating elements	62	54
A.D. Sotnikov: The Design of Digital Filters Based on Microprocessors Using "Distributed Arithmetic"	66	57

	Page English	Russian
PART 2 RADIO ENGINEERING Volume 38		
A.A. Yashin: Integrated Circuit Design Algorithms.....	70	3
V.N. Manzhos, E.P. Zinevich and F.V. Karasev: Efficiency of Two-Position Reception Using Discrete Algorithms in the Frequency Domain.....	75	9
A.I. Babenko, E.F. Zaitsev and V.K. Nuzhin: The Effect of Random Phase Errors on Loss and Inherent Noise of Phased Antenna Arrays.....	81	17
BRIEF COMMUNICATIONS		
A.I. Papkov: Potential Accuracy of the Angle-Measuring Channel of a Complex Radio Short-Range Navigation System.....	87	23
I.M. Kogan: Information Prerequisites of an Ultrastructure.....	89	26
B.E. Rudnitskiy: Accuracy of Tracking a Moving Target Using Angular Coordinates in the Optical Band in the Case of Extremely Weak Signals.	92	29
S.I. Pochuyev: Synthesis of a Quasi-Optimal Instrument for Measuring the Angular Coordinates of a Point Signal Source.....	94	31
P.P. Beskid and V.V. Leont'yev: Optimization of the Position of the Dynamic Range of a Radar Receiver With Repsect to the Mean Level of Reflected-Signal Fluctuations.....	97	34
A.D. Knyazev: Technical Diagnostics of Radioelectronic and Other Apparatus with Respect to Their Electromagnetic Compatibility Parameters...	100	38
S.K. Savin and P.F. Saliyenko: Estimate of the Mutual Influence of a Group of Radio-Electronic Systems.....	103	41
A.I. Ermakov and V.V. Solov'yev: Algorithms for Optimizing the Separable Frequency Band for a Group of Similar Radio-Electronic Systems to Ensure Their Electromagnetic Compatibility.....	106	44
V.M. Nalbandyan: Analysis of a Unistor Active Filter.....	109	47
B.D. Leikin: Synthesis of Frequency Detectors in the Class of Constant-Impedance Circuits.....	112	50
P.L. Gluzman: Analysis of a Type of Magnetic Threshold Device.....	115	54
R.E. Gut and M.L. Minevich: The Efficiency of Parallel Digital Signal Transmission with Frequency Adaptation.....	119	58
A.A. Aleksanyan, V.A. Galakhov and K.K. Nikitin: The Spectrum of Signals and Noise in the Case of Polyharmonic Modulation.....	122	62
V.S. Gutin: The Effectiveness of Choosing Random Phase-Shift Keyed Signals from the Number of Blocks.....	125	64
N.I. Pilipchuk: Error Statistics in Communications Systems with Delta Modulation and Differential Pulse-Code Modulation.....	128	68
V.V. Popovskiy, V.I. Dmitriyev, V.V. Davydenko and Ye.I. Glushankov: Results of an Adaptive Nonparametric Linear Classifier of Polarization-Shift Keyed Signals.....	132	73
A.L. Baranovskiy, A.P. Nemirko, A.V. Smirnov and A.N. Kalinichenko: A Digital Cardiomonitor for Monitoring Arrhythms on an Electrocardiogram..	134	75
V.N. Yegorov, I.N. Mal'tseva and Ye.Yu. Tokareva: Iterational Calculation of the Characteristics of a Dielectric Resonator.....	136	78
K.S. Nikolayeva: The Low-Frequency Limit for Using Ferrite Circulators....	139	80
V.G. Grigor'yev and V.A. Kon'kov: Prediction of the Mean Signal Level in a Long-Distance Tropospheric Radio-Communications Channel.....	140	82
Ye.N. Bazarov and A.T. Polukhin: Excitation of Sound and the Occurrence of Additional Losses in Unimode Fiber Light Guide When Transmitting Amplitude-Modulated Optical Waves.....	143	84
FOR THE ENGINEER		
S.M. Sareyev: Frequency Transposition Circuit Design, Conditional on Preselector Attenuation of Spurious Channels of Given Type	146	87
A.Ye. Grobman: A Method of Eliminating Distortion in Wide-Band Amplifiers with Deep Negative Feedback.....	149	90
A.L. Fedorov and I.L. Fedorov: Root Hodograph Analysis of the Transient and Stationary Conditions of an Oscillatory System.....	151	93

NUMBER 4

	Page English	Russian
PART 1 TELECOMMUNICATIONS Volume 37		
AUTOMATION OF INTERCITY TELEPHONE NETWORK		
B.M. Iokhvin, N.V. Pevtsov, E.I. Sterlina, and A.I. Babasinov: Reserves of Operating Efficiency in Long-Distance Automatic Telephone Exchanges	1	17
N.V. Pevtsov: An Estimate of the Effect of Subscriber Behavior on the Load of a Long-Distance Telephone Network	6	21
M.A. Shneps-Shneppe and A.A. Ozols: Normalization of the Load of Long-Distance Telephone Channels Taking Redialling into Account	9	24
V.A. Yershov and Ya.P. Peneva: Calculation of the Loss Probability in Switching Systems with a Nonuniform Load	13	26
B.P. Zelentsov and N.B. Sutorikhin: A More-Accurate System of Indicators of the Reliability of Switching Junctions and Exchanges	18	30
COMMUNICATION LINES		
Yu.M. Yezhov, V.S. Ivanov and N.D. Kurbatov: Investigation of the Interference in Coaxial Cables Used for Digital Transmission Systems.	21	34
V.C. Akkuratova and A.P. Markelov: A Computer Calculation of the Transmission Parameters of Coaxial Cables	24	36
Ye.V. Balovlenkov and V.M. Bondar': Calculation of the Components of the Electromagnetic Field of a Helical Line with an Arbitrary Periodic Structure	28	39
Yu.P. Shkarin: Determination of the Interference Votlage from External Sources in Multiconductor Transmission Lines	31	41
SIGNAL CONVERSION		
L.M. Goldenberg, A.V. Brunchenko, B.D. Matyushkin, M.N. Polyak, A.O. Talanov and L.A. Yakovlev: Digital Filters Used to Convert an Analog Signal into a PCM Signal	37	49
V.N. Malinovskiy and S.K. Romanov: Computer Simulation of Frequency Synthesizers with Ring-Type Pulse-Phase Automatic Frequency Control	42	52
I.V. Gryaznykh: Digital Automatic Gain Controllers for Radio Equipment	50	59
G.V. Petrov, Kh.Kh. Salakhov and A.I. Tolstoy: Balanced Microwave Amplifiers for the 2-4 GHz Frequency Band	53	61
Ye.P. Metsner: A 35 GHz Gunn-Diode Oscillator with Electronic Frequency Tuning	55	63
PART 2 RADIO ENGINEERING Volume 38		
I.Kh. Rizkin: Analysis and Design of Radio Systems, Devices and Circuits — The Structures of the Problems	57	3
L.A. Ershov and A.V. Ivanov: Reception of Digital Signals in the Presence of Impulse Interference	61	8
BRIEF COMMUNICATIONS		
RADIO ENGINEERING SYSTEMS		
G.A.Ponomarev and V.B. Fortes: Signal Distortion in Communications Channels with Large-Scale Discrete Screening Nonuniformities	66	13
N.K. Milenin: The Choice of the Characteristics of Linear Filters in Television Devices with Picture Sampling	68	16

	Page English	Page Russian
RADIO CIRCUITS AND DEVICES		
L.I. Volgin: Reversible Topological Transformation of Radio Circuits with Feedback	71	19
A.V. Khevrolin: Calculation of the Noise Factor of Devices with Feedback	73	22
E.M. Manukhyan: Synthesis of Sequential Systems Using DV Flip-Flops	76	25
A.A. Reznev: Some Problems in Designing Miniature Tunnel-Diode Oscillators	78	27
A.F. Tereshchenko and G.N. Dekin: Optimization of the Operating Mode of Gunn-Diode Autodynes	81	30
G.M. Kuperman and A.N. Myshenskiy; Energy Characteristics of the Output Pulse From Modulators with an Artificial Line	84	33
V.I. Konstantinov, V.L. Masalov, A.D. Tokarev and A.A. Filyuk: A Broadband Synchronizer of Microwave Oscillators	86	36
S.Kh. Karpenkov: Characteristics of Asymmetric Thin-Film Magnetic Heads.	87	38
THEORY AND METHODS OF SIGNAL TRANSMISSION		
A.F. Fomin, V.S. Kostroma and V.P. Batrayev: Estimation of the Interference-Immunity of FM Transmission Systems in the Presence of Impulse Interference	91	41
A.I. Velichkin, Yu.A. Surovtsev and B.G. Tatarskiy: Determination of the Parameters of a Quantizer in a PCM Radio Communication System	93	44
R.G. Tolparev and E.V. Borisov: Estimation of the Noise Parameters in Optical-Signal Detectors	96	48
Yu.V. Shukevich: Nonlinearity of the Procedure for Converting Information into Rank Form	99	52
A.V. Bondarenko and V.V. Bondarenko: Optimization of the Digital Representation of Signals	101	54
ANTENNA-WAVEGUIDE ENGINEERING. PROPAGATION OF RADIO WAVES. MILLIMETER AND SUBMILLIMETER WAVE ENGINEERING.		
T.L. Nguyen: The Reception of SW Signals by Two Mutually Perpendicular Antennas	104	57
S.P. Brovchenko and V.A. Malyshev: Microstrip Inverting Four-Terminal Microwave Networks with a Symmetrical Transfer-Constant Characteristic	107	61
V.A. Germanov and N.G. Stebleva: Features of the Operation of Miniature-Waveguide Semiconductor Switches	109	64
V.P. Meshchanov, S.A. Saliy, A.L. Fel'dshteyn and L.V. Shikova: Synthesis of Stepped Transmission Lines with a TEM-Mode	111	66
A.P. Rodimov, S.V. Nikitin and V.V. Nikitchenko: Analysis of the Effect of Fluctuations of the Parameters of Short-Term Interference on the Effectiveness of Spatial-Polarization Processing	115	71
S.F. Mirkotan, S.V. Zhuravlev and Yu.N. Kosovtsov: Experimental Investigation of a Multiplicative Model of Multiple Ionospheric Reflections	118	74
RADIO-OPTICS		
N.F. Maksakov: Compression of Pulses That have been "Stretched" by an Optically Excited Array	121	77
A.V. Khramov: Measurement of the S-Parameters of Transistors Under Large-Signal Conditions	123	80
P.L. Asovich and A.A. Solov'yev: A Rapid Method of Calculating the Amplitude and Frequency Characteristics of Nonlinear Radio Channels	124	81
N.N. Savkov: Analysis of the Linear Properties of Active R-Filters Employing Operational Amplifiers	127	84
V.I. Zakirov: A Method of Linearizing the Modulation Characteristic of Oscillators	130	87
V.A. Bondar', A.V. Topor and A.U. Kas'yanov: A High-Power Pulse Integrator.	132	90

	Page English	Page Russian
S.V. Pavlov, V.A. Sakharov and N.K. Vasil'yeva: Calculation of the Adjustment Characteristics of the Pulsed Converter of a High-Voltage Source	134	92

PART 1
TELECOMMUNICATIONS
Volume 37

SATELLITE COMMUNICATIONS

G.V. Rabinovich, B.Ya. Dybman, N.N. Marishichev, O.S. Tikhonov and V.F. Firov: Digital Sound Broadcasting and Data Transmission Equipment for the "Intersputnik" System	1	5
M.M. Simonov and G.Kh. Pan'kov: The Design and Application of Phase-Locked Frequency Control Relay Circuits to Satellite Communications Systems with Time Division Multistation Access	7	9
B.A. Lokshin, I.B. Listov and N.I. Nikulin: Measurement of the Signal-to Background Noise Ratio of a Satellite TV Channel when the Energy of the FM Signal is Dispersed	12	13

TRUNKLINE COMMUNICATIONS

A.A. Vorob'yev and L.B. Rozenbaum: Nontraditional Methods of Cooling the Inductive Elements of High Power Medium- and Long-Wave Radio Transmitters	15	15
Ya.A. Kacherovich: Method for Transmitting Control Signals for Radio-Broadcasting Equipment over Occupied Channels	20	19
V.Yu. Baevskiy and V.B. Kozyrev: The Design of Switchable Filters for Transmitters Covering a Wide Frequency Band	24	21
I.I. Golombek and V.B. Kopylev: A Matching Unit for a Broadband VHF Radio Transmitter	30	25
I.N. Lobanova and M.P. Morozov: A Method of Increasing the Noise Immunity of Equipment Based on Frequency Division of the Channels Using a Multibeam Signal	33	28

MULTICHANNEL COMMUNICATIONS

M.M. Ptichnikov, L.M. Polyak and Yu.P. Savchenko: The Use of the Redundancy of a Trunk-Line Code to Obtain Supervisory Communication for a Digital Transmission System	37	38
E.V. Novikov, E.N. Rubinshtein, R.G. Strongin, A.V. Barkalov and M.M. Novikova: A Simulator of the Regeneration Sections for a Digital Transmission System	41	41

DATA TRANSMISSION. TELEGRAPHY

D.A. Tsirelson, V.I. Sedov, V.A. Kalynyuk and I.B. Melikhov: An Analog-Digital Converter for Data Transmission Equipment	46	49
Yu.F. Pelegov, V.P. Repkin and A.V. Mazharova: A Method of Reception as a Whole and Its Implementation in the M-1200 Modem	50	52
N.N. Belousov and V.E. Martirosov: Statistical Analysis of an Adaptive-Quasi-Coherent Demodulator of a Phase-Shift Keyed Signal	56	56

PART 2
RADIO ENGINEERING
Volume 38

L.E. Varakin: Noise Immunity of the Reception of PWM and FM Spread-Spectrum Signals	62	9

	Page English	Page Russian
A.S. Naumov: Noise Immunity of Sorting Algorithms of Reception as a Whole	68	14
V.P. Bisyarin: Determination of the Intensity Attenuation of Visible, Infrared and Millimeter Waves in Clouds Using Meteorological Models	74	21
BRIEF COMMUNICATIONS		
RADIO-ELECTRONIC CIRCUITS AND DEVICES		
M.U. Bank: A Broadcast Receiver with the Ability to Select One Sideband	80	28
A.R. Shvartsman and E.A. Shvartsman: Digital-Analog Automatic Gain Control of a Radio Receiver	83	31
B.A. Stryukov and P.V. Milyayev: A Picosecond Radio-Pulse Reflectometer	85	33
V.I. Kaganov, M.V. Golitsin and A.V. Tabakov: Reduction of Nonlinear Distortions and Calculation of the Spectrum of the Complex Signal of a Transistor Amplifier	88	36
M.M. Doktorevich and V.G. Shinkarenko: Stability of Gunn-Diode Oscillations in the LSA Mode	90	39
M.B. Khaletskiy and V.A. Virkovskiy: Features of the Tape Magnetization by the Field of a Thin-Film Magnetic Head	93	42
THEORY AND METHODS OF SIGNAL TRANSMISSION		
A.S. Vorob'yev: A Method of Increasing the Noise Immunity of Synchronous Communications Systems in which the Signals are Separated by Shape	97	46
A.I. Zhodzishskiy and Yu. I. Zhodzishskiy: Potential Estimates of Signal Delay Time Under Strict Conflict Conditions	98	47
L.G. Endovitskaya: Computer-Simulation of Combined Detection and Filtering Devices	101	51
E.I. Lifanov and V.A. Likharev: Estimate of the Covariation Matrix of Stationary Interference	103	53
THE APPLICATION OF MICROPROCESSORS IN RADIO ENGINEERING, ELECTRONICS AND COMMUNICATIONS		
G.V. Lipinskiy, A.O. Timofeyev and A.T. Trifonov: The Use of a Microcomputer in Measurement Pulse Generators	106	56
ANTENNA-WAVEGUIDE TECHNIQUE. RADIO-WAVE PROPAGATION. MILLIMETER AND SUBMILLIMETER WAVE TECHNIQUES		
I.N. Klepikov, V.S. Kolesnikov, V.K. Kuz'michev, Yu.A. Pirogov and Yu. B. Khapin: Bandpass Filters Based on Multilayer Dielectric Structures	109	59
